A Century on  
Shellac and Vinyl

14 July – 16 October 2016

*Jukebox, Jewkbox!* takes you on a musical journey of discovery through popular culture and history, featuring the records that changed lives and the technology that made it happen.

In the late 19th century, a German-Jewish immigrant to the USA changed the world. With Emil Berliner's invention of the gramophone, music found its first global medium and the recording industry was born.

This interactive exhibition takes that moment in history as its starting point, exploring the experience of the 20th century through shellac and vinyl, celebrating the history of Jewish inventors, musicians, composers, music producers and songwriters.

See early examples of phonographs and gramophones and immerse yourself in the sounds of the 20th century; from Jewish folk music to Yiddish theatre songs, from Broadway musicals to rock'n'roll via the rebels of punk and psychedelic rock.

Right: An example of an early Odeon Koffer gramophone

Hear personal stories from artists, musicians and collectors. Explore the art of the record sleeve and enjoy a display of 500 records including iconic sleeves from Amy Winehouse, the Ramones, Bob Dylan, and Barbara Streisand.

This exhibition was developed by the Jewish Museum Hohenems in collaboration with the Jewish Museum Munich.
